# Training Services - Engaging Learning

## A new system, new internal processes or new legislation to comply with?

Training is fundamental to the successful take up of new systems, or ensuring that employees have the proper understanding of new legislation e.g health and safety & data protection, or simply for the adoption of new internal processes. But how many businesses fail to invest in solutions aimed at providing their employees with the best and most suitable learning methods? We have a team of expert trainers using tailored software solutions to provide modern and focussed learning services to train staff in a productive and engaging way via a positive learning experience.

We also provide a cost effective platform to host these training modules on our own dedicated LMS system, providing companies with a low cost way of monitoring their employees use of training materials without the need to purchase their own LMS platform.

## Our Training Service includes:

### Engaging Learning

Gears labelled: Training Needs Analysis; Training Development & Delivery Management; eLearning; Train the Trainer; End User Training; Super User & Technical Training

### eLearning

Accessible training 24/7 anytime, anywhere.

### End User Training

Introduction to new software, systems or internal processes, or new legislation. Training can be provided for business system modules, stand alone corporate initiatives or internal certifications.

### Super User Training

Systems design, build and 'configuration'.

Report creation and development.

System administration including roles and users, database views, flexifields.

Standard Unit4 Business World Course Catalogue

### Upgrades Workshops and Differences Training

Learn about the latest functionality and how it can benefit your organisation.

### Technical Training

Introduction to the system architecture, the infrastructure that is required to support this and how it needs to be managed.

## Here are a few things to consider:

By using Embridge, you benefit from our expertise and knowledge that we have gained over a significant number of years.

Our training capitalises on what we have learnt from other projects and organisations.

We've already done the hard work in developing a series of guidance notes and training materials, so you don't have to.

Our trainers ensure that even the most technical subject sessions are engaging, easily understood and comprehensive.

## What our customers say:

"At Lincolnshire County Council we had an urgent need to design and create a number of learning solutions at short notice to enable employees to use Agresso upon its launch some 6 months later. Embridge Consulting were recommended to us as having a proven track record in both project management and delivery of engaging learning solutions and from the very first conversation with them, they had started to help us see the light at the end of what had been a very long and dark tunnel. The commitment, flexibility and sheer determination of all the Embridge trainers who have helped us develop a great learning offer has been outstanding."

Matt Bullock, Agresso Change & Communications Workstream Lead, Lincolnshire County Council
